

# CHRISTOPHER CANTU

Senior Engineering Leader | Delivery Transformation Specialist

chris.m.cantu@icloud.com | 210-621-3229

Senior Engineering leader specializing in delivery transformation at post-IPO and enterprise technology companies. Expert in rescuing broken delivery systems and building scalable platforms that enable consistent time to market. 15+ years leading multinational engineering organizations (60+ engineers) through complex transformations while maintaining quality and compliance. Track record: transformed CI/CD reliability from 1-5% to 95-99%; reduced deployment cycles from 6 months to minutes; unlocked \$18M+ in business value.

## KEY ACCOMPLISHMENTS

### Revenue Impact

Delivered \$18M+ in business value through delivery transformation and international expansion

### Delivery Excellence

Transformed CI/CD from 1-5% to 95-99% reliability, enabling consistent fast delivery

### Speed to Market

Accelerated deployment from 6 months to minutes; achieved 20x release velocity increase

### Platform Scaling

85% design system adoption across 185 repos in 6 months via automation

### Cost Optimization

\$10M+ operational savings through automation and platform consolidation

### Global Leadership

Scaled teams to multinational organizations across US, Europe, Africa, and Asia

## PROFESSIONAL EXPERIENCE

### Director of Engineering | Procore Technologies

Austin, TX (Hybrid) | September 2023 – Present

**Challenge:** Lead \$50M+ frontend modernization across 125+ repositories and 65+ global teams to enable Procore's strategic web experience vision—no unified platform existed to execute at this scale.

**Action:** Lead 60 engineers across 8 international teams through delivery transformation, platform consolidation, and quality automation.

#### Results:

- Reduced localization deployment from 6 months to minutes, unlocking \$12M+ revenue in European/Asian markets within first year
- Achieved 85% design system adoption across 185 repositories in 6 months via AI-driven automation—fastest in company history
- Created contextual, customizable platform enabling product re-envisioning and supporting AI-powered product initiatives
- Partner with VP of Product, VP of Engineering, and VP of Customer Success on technology strategy for international growth

### Director of Front End Platforms | Babylon Health

Austin, TX (Remote) | September 2021 – August 2023

**Challenge:** Babylon's product teams were blocked from fast delivery—1% pipeline reliability and manual testing processes prevented the velocity needed to scale across multi-market operations.

**Action:** Led 30 engineers across 5 platform teams (US, Europe) to modernize testing processes and automate delivery capabilities, enabling product teams to ship independently without manual bottlenecks.

**Results:**

- Transformed CI/CD from 1% to 95% success rate by modernizing testing and automating delivery, enabling teams to ship independently at scale
- Pioneered weekly mobile release cadence through automated testing, feature flags, and progressive rollouts
- Architected micro-frontend infrastructure deployable as single artifact, enabling 3x faster feature delivery with WCAG compliance

**Senior Software Engineering Manager → Director of Engineering | Vrbo (Expedia Group)**

*Austin, TX | November 2016 – February 2021*

**Challenge:** Monolithic architecture prevented rapid experimentation and blocked revenue growth opportunities through A/B testing while release velocity couldn't support business growth.

**Action:** Led digital transformation from monolithic to microservices architecture while establishing modern DevOps practices. Promoted to Director in July 2020 to scale impact across 5 international platform teams.

**Results:**

**As Director of Engineering (July 2020 – February 2021):**

- Led 25+ engineers across 5 international platform teams (frontend/backend architecture, GraphQL, SRE, development tooling) supporting \$2.4B in booking revenue
- Converted organization to ShapeUp methodology, improving team engagement, delivery velocity, and measurable business impact
- Established architectural patterns and design standards adopted across Expedia's enterprise engineering organization
- Led performance testing and chaos engineering initiatives ensuring uninterrupted service during peak booking periods

**As Senior Software Engineering Manager (November 2016 – June 2020):**

- Led migration from monolithic to microservices architecture, enabling rapid A/B testing that generated \$8M+ revenue growth
- Achieved 20x increase in release velocity by instituting modern CI/CD practices including automated testing, branching strategies, and deployment automation across all UI applications
- Established customer-centric observability platform with automated monitoring and alerting methodology, scaling production system support as platform grew
- Pioneered WCAG-compliant accessibility with sustainable automation, enabling visually impaired customers to shop on vrbo.com through tailored experiences
- Successfully executed multiple large-scale system migrations while maintaining positive conversion and engagement metrics

## **EDUCATION & EXPERTISE**

**Master of Science in Information Systems | Bachelor of Business Administration**

Baylor University

**Core Expertise:** Delivery Transformation • Platform Engineering • CI/CD Optimization • Multinational Team Leadership • Design Systems • DevOps Excellence • Quality Automation • A/B Testing • Accessibility (WCAG) • Cost Optimization • Strategic Technology Planning
